Company Profile

M.A. Proteins is a subsidiary of Sind Feeds & Allied Products which is one of the pioneers to develop poultry and fishmeal sector in Pakistan. The fishmeal has been under the expertise of Sind Feeds and Allied Products since 1970's and since 2005 it has taken its fishmeal business to the heights of new standards by establishing three (3) 100% steam dried fishmeal plants. All the fishmeal plants are supplied by the world famous fishmeal plant manufacturers called "Atlas Stord".

M.A. Proteins started with a total production capacity of 9000mt of finished fishmeal per year in 2005. But now it has a production capacity of 36000mt of fishmeal out of which we expect to produce around 20,000mt of fishmeal every year depending on the catch of fish.

M.A. Proteins has always learnt from its management to thrive on quality and quality alone. We give high priority to the Quality and Freshness of the fish that we use to manufacture fishmeal.

M.A. Proteins has acquired 23 boats that catch fresh fish only for the company.

Our fishmeal is produced in a very careful environment while keeping the HACCP in full check and under the strict bio security surveillance. We have many technical and semi-technical staff that looks after the matter in a very strict manner and has full fledged training of handling and stacking fishmeal.

All in all, M.A. Proteins has invested its future in the fishmeal business and it is ready to take up the challenge of providing top quality fishmeal to its prestigious customers all around the world.

Quality Standards

- We have a fully equipped laboratory within our facilities to monitor and ensure that we provide our specification and quality as guaranteed.
- We have one of the best fish meal plants in Pakistan of "Atlas Stord"
- The Fish meal being manufactured in M.A. Protein is 100% steam dried.
- M.A. Proteins has CHINA LICENSE and AQSIQ approval to freely export its fishmeal to China.
- We strongly believe in supplying 100% pure quality and discourage any sort of mixing in our fish meal.
- All our export consignments are subject to SGS certificate of quality and weight.
- We do not produce any other animal feeding stuff: products such as meat & bone meals, poultry meals, feather meals or others where our fishmeal is being produced. All other facilities are far from each other.
- We provide with every export consignment the certificate to country of origin, certificate of no. terrestrial animals meals, certificate of E.coli and Salmonella free.
- We do not add any antibiotics to our fish meal and a certificate to this effect may be issued with the export documents, if required.
- We are using antioxidant in our fish meal to ensure the best quality till the buyers door.
- We supply fish meal packed in our new green 50 kg P.P bags, but when the fish meal is produced we keep it in jute bags to make sure the quality standards we offer are achieved.
- We have full HACCP plan in process of all our fishmeal plants to ensure the top quality.
- The Bio Security is very strict at all our fishmeal plants to ensure no cross contamination or disease of any sort.
- All our plants are washed and cleansed every day thoroughly to maintain the high standards of our facilities.
- We can also provide 25kg p.p bags with polythene inline if required by our customers.
- M.A. Proteins proves its prestige and commitment by being the only environment friendly fishmeal manufacturer in Pakistan by having a deodoriser and scrubber for smell reduction and environment protection. M.A. Proteins is an environmentally responsible organisation.
